HARBOR SPRINGS, MICHIGAN

Telephone 123

Fall 1950

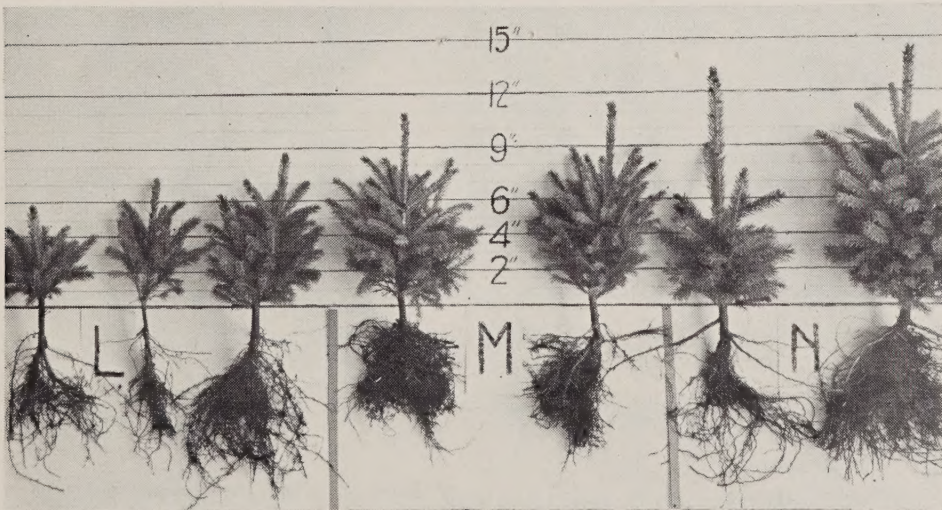

Spring 1951

This area is a natural home of Spruces, Balsam, American Arborvitae and other Conifers. No better Pine timber was ever cut than the White Pine of Northern Michigan. Our natural sandy loam soil lends itself well to the development of a good root system.

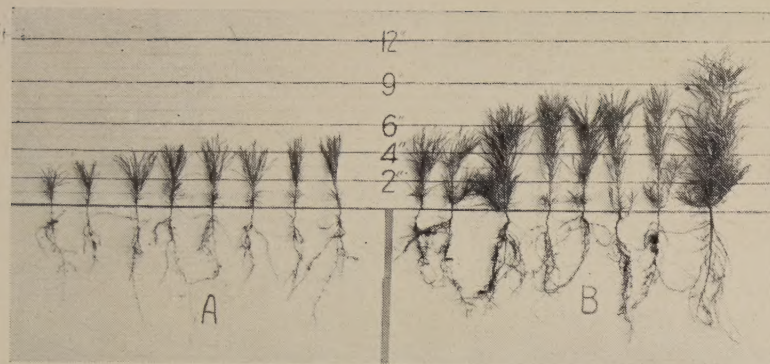

Black Hills Spruce, naturally of compact habit, is well started for landscape use by transplanting every second year. It has a mass of fiber roots, a tight top, and an abundance of buds for next season's new branches.

	per 100
